JOB POST

I'm looking for an SEO expert to execute a backlink strategy by leveraging competitors that have ceased operations but still have a strong SEO presence. The goal is to identify backlinks to their content, replicate their high-performing blogs with enhanced content, and reach out to referring domains to suggest linking to my site instead.

Key Responsibilities

Backlink Analysis: I can most likely do this myself and provide the target posts and referring domains, however open to a freelancer doing this as well if it makes more sense to do so.

Content Replication: Plan and create high-quality, SEO-optimized content based on the competitors' most-linked blog posts. I'm ok with this being produced primarily with AI to keep costs down as it is primarily intended to get the backlink versus rank for SEO to start. (if we are successful in getting the backlinks, we would then need to go in and implement better SEO practices to make the content more unique to rank higher.

Outreach: Contact referring domains using a personalized "skyscraper technique," highlighting that the competitor is inactive and offering my content as a superior replacement.

If successful, this project could expand into broader SEO opportunities.

Please reply with a thoughtful response indicating you understand the requirements versus a copy/paste response.

PROPOSAL

Hi Andy!

Starting with an advanced AUDIT of your website's backlink profile and content, I'll leverage your competitor's backlink and content analysis to develop and implement an effective SEO strategy to align with your goals. I'll identify High-Quality Contextual backlinks from your competitors, replicate and draft unique, SEO-optimized content and run & manage an outreach campaign to acquire backlinks. Will you please share the URL of your site and a list of your competitors, so I can start the process?

JOB POST

We've worked with a large number of link builders, and we know SEO. We're looking for an individual who is able to obtain links for us on an ongoing basis through research and outreach.

We are open to long-term planning, and could collaborate on long-term strategies for content marketing.

You need to be experienced at this, with a proven track record. You need to be able to build links on various platforms, in a range of industries.

You need to have your own access to paid tools (either SEMRush, Moz or Ahrefs).

Quality is paramount. There will be a range of projects, each with different levels of budgets.

We'll begin this project with a (paid) test to obtain links to internal pages for a couple of sites within 20 days. We can discuss budgets, targets, and anchors via chat.

We're open to discussing a regular salary, a pay per link, or a hybrid payment system based on DR etc.

After analyzing our product page for the keyword "hydrogen water bottle," I noticed that we are currently not ranking on the SERPs. One key issue is the content quality. My analysis, using both manual methods and various tools, indicates that the content on our product page appears to be AI-generated. To improve our rankings, we should rewrite and publish content that is crafted by a human, ensuring it resonates more effectively with both users and search engines.

Additionally, the on-page SEO for our product page is not fully optimized. We need to address this by implementing best practices, such as refining our heading tags, internal linking, and keyword usage. After that, we will focus on off-page SEO, where we will acquire backlinks using various techniques, both paid and free.

Our blog posts also require optimization from an on-page SEO perspective. We should focus on targeting low-competition keywords to increase our chances of ranking higher in search results. By addressing these issues, we can enhance the visibility of our product and blog pages.

Are you ready to dive in and learn how I boosted Organic traffic Exponentially for a previous client? Here is the report where its traffic improved by 107K from 0, top 3 ranked keyword increased from 0 to 203 and domain authority improved from 1 to 39, link to details:

I am an SEO specialist with 5+ years of experience in Technical, ON-Page & OFF-Page SEO. I would be honored to further discuss the specifics of your project and offer my insights. May I suggest scheduling a call or virtual meeting at your earliest convenience to delve deeper into the details?
